NOTES

Unless otherwise indicated, all years referred to in this report are fiscal years.

Details in the text and tables of this report may not add to totals because of rounding.

PREFACE

An Analysis of President Carter's Budgetary Proposals for Fiscal Year 1982 was prepared at the request of the House Committee on Appropriations to assist Members and staff in preparing for overview hearings on the 1982 budget. The report analyzes the economic outlook for the next two years and the fiscal year impact of President Carter's budgetary proposals. It also examines the major features of the Carter Administration's revenue and spending proposals for 1982 and compares them with past trends and current laws. The effect of the latest Administration budget estimates for the current fiscal year (1981) is presented. Finally, the report contains a brief discussion of the federal credit budget, off-budget outlays, and the federal debt.

The report was prepared by staffs of the Budget Analysis, Fiscal Analysis, and Tax Analysis Divisions, under the supervision of James Blum, William Beeman, and James Verdier. Thelma L. Jones supervised the production of the report, Patricia H. Johnston and Francis S. Pierce edited the manuscript, and it was typed for publication by the Budget Analysis Division.
