

Historical Budget Data

This appendix provides historical data on revenues, outlays, and the deficit or surplus—in forms consistent with the projections in Chapters 1, 3, and 4—for fiscal years 1974 to 2013. The data, which come from the Congressional Budget Office and the Office of Management and Budget, are shown both in nominal dollars and as a percentage of gross domestic product (GDP). Some of the numbers have been revised since August 2013, when these tables were previously published on CBO’s website (www.cbo.gov). The percentages of GDP shown in these tables (and in those published in August) reflect the comprehensive revision of the national income and product accounts that the Bureau of Economic Analysis released in July 2013. The net effect of that revision was to increase the value of nominal GDP throughout the 1974–2013 period. (For a description of that revision, see Box 2-1 on page 29.)

Federal revenues, outlays, the deficit or surplus, and debt held by the public are shown in Table H-1. Revenues, outlays, and the deficit or surplus have both on-budget and off-budget components. Social Security’s receipts and outlays were placed off-budget by the Balanced Budget and Emergency Deficit Control Act of 1985. For the sake of consistency, Table H-1 shows the budgetary components of Social Security as off-budget before that year. The Postal Service was classified as off-budget by the Omnibus Budget Reconciliation Act of 1989.

The major sources of federal revenues (including off-budget revenues) are presented in Table H-2 on page 158. Social insurance taxes include payments by employers and employees for Social Security, Medicare, Railroad Retirement, and unemployment insurance, as well as pension contributions by federal workers. Excise taxes are levied on certain products and services, such as gasoline, alcoholic beverages, and air travel. Estate and gift taxes are levied on assets when they are transferred.

Miscellaneous receipts consist of earnings of the Federal Reserve System and income from numerous fees and charges.

Total outlays for major categories of spending (including off-budget outlays) appear in Table H-3 on page 160. Spending controlled by the appropriation process is classified as discretionary. Spending governed by laws other than appropriation acts, such as laws that set eligibility requirements for certain programs, is considered mandatory. Offsetting receipts include the government’s contributions to retirement programs for its employees, as well as fees, charges (such as Medicare premiums), and receipts from the use of federally controlled land and offshore territory. Net interest (function 900 of the budget) consists mostly of the government’s interest payments on federal debt offset by its interest income.

Table H-4 on page 162 divides discretionary spending into its defense and nondefense components. Table H-5 on page 164 shows mandatory outlays for three major benefit programs—Social Security, Medicare, and Medicaid—and for other categories of mandatory spending. Income security programs provide benefits to recipients with limited income and assets; those programs include unemployment compensation, Supplemental Security Income, and the Supplemental Nutrition Assistance Program (formerly known as Food Stamps). Other federal retirement and disability programs provide benefits to federal civilian employees, members of the military, and veterans. The category of other mandatory programs includes the activities of the Commodity Credit Corporation, the Medicare-Eligible Retiree Health Care Fund, the subsidy costs of federal student loan programs, the Children’s Health Insurance Program, and programs related to the federal government’s response to problems in the housing and financial markets.
