

USDA's Farm Programs

The Commodity Credit Corporation (CCC) accounts for a significant portion of mandatory federal spending for agriculture through a wide range of programs shown in the general summary tables. CCC provides commodity price and income supports mainly through four programs:

- The **Price Loss Coverage** program makes payments to producers when the annual average market price per unit of a covered commodity falls below the reference price set in law. Beginning with the 2019 crop year, the Price Loss Coverage program makes payments when the annual average market price per unit of a covered commodity falls below the effective reference price, as defined in the 2018 farm bill (Public Law 115-334, the Agriculture Improvement Act of 2018).
- The **Agriculture Risk Coverage—County** program makes payments to producers when the actual average revenue for a crop (price times production) within the producer's county falls below the local guaranteed amount, which is based on an average for recent years.
- The **Marketing Loan** program makes short-term loans to farmers at specified commodity loan rates using current production as collateral. Nonrecourse loans may be repaid at less than principle plus interest if the market price estimated by the Department of Agriculture drops below the loan rate. The commodity also may be forfeited to CCC in lieu of loan repayment. Once a loan is repaid, producers are free to sell their crops.
- The **Dairy Support** program makes payments to producers to account for the difference between the monthly milk price and the cost of feed. Participants may choose the size of the margin they wish to cover and may be required to pay a premium to the government for such protection.

Participants in the Price Loss Coverage Program and in the Agriculture Risk Coverage program may receive payments from only one such program in any given year. The loan program is available to qualified producers in any year. The dairy supports program operates continuously.

Crop Insurance

Through the Federal Crop Insurance Corporation, producers may purchase insurance against major losses in yield or revenues for their crops. On average, the federal government pays 60 percent of a producer's insurance premiums. The government also reimburses private-sector insurance companies for administrative expenses and underwriting gains (a company's share of total gains and losses for insurance policies).

Conservation Programs

The federal government has programs to encourage producers to take fragile land out of production or to make improvements that promote land conservation by preventing erosion or improving productivity, for example.

USDA's Farm Programs

Disaster Assistance

The federal government offers producers assistance when natural disasters reduce feed available for livestock, cause above-average death rates among livestock, or damage trees.

Commodity Background Tables

Total costs of commodity programs are derived from estimates for individual eligible commodities. Critical factors used to estimate program costs depend on projections of the price, yield, and program acres for each commodity. Historically, prices for a given commodity have been related to, among other things, the ratio of ending stocks to total use. A relatively high ratio implies an excess supply, which usually is associated with a lower price. Estimating prices according to historical relationships helps to keep price projections consistent with other market variables.

To help the agency consider changes to its baseline estimates, CBO convenes a meeting of agricultural economists each fall to discuss supply, demand, and price forecasts for major agricultural commodities like corn, soybeans, wheat, and cotton. In addition, crop insurance analysts are invited to review past performance of the crop insurance program and to discuss program changes. Attendees include economists from the Department of Agriculture's Office of the Chief Economist, World Agricultural Outlook Board, Economic Research Service, Farm Service Agency, Foreign Agricultural Service, and Risk Management Agency, as well as agricultural economists from various universities and private enterprises.

CBO's May 2022 Baseline for Farm Programs

Adjusted for Sequestration from FY 2021 to FY 2031

Abbreviations Used in Farm Programs Baseline Tables

ARC	Agriculture Risk Coverage
AWP	Adjusted World Price
CCC	Commodity Credit Corporation
CO	County Coverage
CRP	Conservation Reserve Program
ELS	Extra-Long Staple Cotton
FCIC	Federal Crop Insurance Corporation
FSI	Food, Seed, and Industrial
FY	Fiscal Year
IC	Individual Coverage
MLG	Marketing Loan Gain
NRCS	Natural Resources Conservation Service
OMB	Office of Management and Budget
PLC	Price Loss Coverage
USDA	U.S. Department of Agriculture

Components may not sum to totals because of rounding.
In some cases, 2021 spending is indicated as estimated because actual spending by program component is incomplete.

a. This is the account for Commodity Credit Corporation price support programs in budget function 350 (agriculture). It includes those activities listed on the following page. It does not include conservation programs. CRP and several conservation programs were added to CCC in 1996, but remain under budget function 300 (natural resources and environment).

b. These amounts reflect projected direct spending for conservation programs shown by OMB under the CCC account total.

c. This total is consistent with categories included in USDA's CCC total for budget functions 350 and 300; includes some minor loan program accounts.

The FY 2021 total does not reflect \$3 billion in transfers from the CCC to other agencies.

d. These amounts reflect projected direct spending for conservation programs shown by OMB under the NRCS account, reflecting program spending reauthorized by the 2018 farm bill.

e. This total is the sum of CCC plus NRCS conservation direct spending.
