

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

June 5, 2000

H.R. 4391 **Mobile Telecommunications Sourcing Act**

As ordered reported by the House Committee on the Judiciary on May 24, 2000

SUMMARY

CBO estimates that enactment of H.R. 4391 would have a negligible effect on the federal budget. Two years after enactment, H.R. 4391 would prohibit state and local governments from taxing mobile telecommunications calls unless a customer's place of primary telephone use is within the taxing jurisdiction of the state or local government. The bill would encourage states to provide mobile telephone companies with a database that shows which addresses fall within which taxing jurisdictions. Mobile telephone companies would be held harmless for any mistakes in taxes collected because of errors in the database, or from errors they might make before a state provides such a database.

Certain charges imposed on telecommunications services either by states or the federal government under the Telecommunications Act of 1996 to support universal service are recorded in the federal budget. (Universal Service is a program intended to promote the availability of telecommunications services at affordable rates.) Because H.R. 4391 could affect direct spending and receipts, pay-as-you-go procedures would apply, but CBO estimates that any such effects would be negligible.

H.R. 4391 contains an intergovernmental mandate as defined in the Unfunded Mandates Reform Act (UMRA), because it would preempt state and local government laws by prohibiting jurisdictions from taxing mobile telecommunication services unless the jurisdictions contain the customer's place of primary use. While data are limited, CBO estimates the mandate would not impose significant net costs on state or local governments and would not exceed the threshold established in UMRA (\$55 million in 2000, adjusted annually for inflation). The bill contains no new private-sector mandates as defined in UMRA.

ESTIMATED COST TO THE FEDERAL GOVERNMENT

Under the Universal Service Fund established by the Telecommunications Act of 1996, the Federal Communications Commission (FCC) seeks to provide universal access to telecommunications services through various charges to some telephone companies and payments to others. The 1996 act also permits states to establish additional collections and payments to preserve and advance universal service, so long as these mechanisms are not inconsistent with federal law.

The Universal Service Fund records these transactions on the federal budget as governmental receipts and direct spending. To the extent that states choose to use charges on mobile telecommunications service to support universal service, H.R. 4391 could result in reduced revenues collected and lower direct spending. But based on information from the FCC and the Universal Service Administrative Company, CBO estimates that any change in revenues and direct spending as a result of enacting this legislation would be negligible. The costs of this legislation fall within budget function 370 (commerce and housing credit).

PAY-AS-YOU-GO CONSIDERATIONS

The Balanced Budget and Emergency Deficit Control Act sets up pay-as-you-go procedures for legislation affecting direct spending or receipts. As noted above, H.R. 4391 could affect direct spending and receipts, but CBO estimates that any such effects would be negligible.

ESTIMATED IMPACT ON STATE, LOCAL, AND TRIBAL GOVERNMENTS

H.R. 4391 would preempt state and local government laws by prohibiting jurisdictions from taxing mobile telecommunication services unless the jurisdictions contain the customer's place of primary use. Such a preemption would be a mandate as defined by UMRA. This change could initially benefit some taxing jurisdictions and harm others depending on the number of customers with places of primary use within each jurisdiction. The bill would not require or prohibit state and local governments from taxing telecommunications services or affect the rate at which such services could be taxed. It would, however, require a uniform basis for determining which jurisdictions may tax mobile telecommunications services.

Because the current system of taxing mobile telecommunications services is very complex, it is unclear what affect this change may have on revenues from such taxes. Based on information from groups representing the affected state and local governments, however, CBO estimates that the bill would, in total, be approximately revenue neutral across the country, although the distribution of revenues among jurisdictions would likely change.

ESTIMATED IMPACT ON THE PRIVATE SECTOR

The bill contains no new private-sector mandates as defined in UMRA.

PREVIOUS CBO ESTIMATES

On May 22, 2000, CBO transmitted a cost estimate of H.R. 3489, the Wireless Telecommunications Sourcing Act, as ordered reported by the House Committee on Commerce on May 17, 2000. On May 9, 2000, CBO transmitted a cost estimate of S. 1755, the Mobile Telecommunications Sourcing Act, as ordered reported by the Senate Committee on Commerce, Science, and Transportation on April 13, 2000. H.R. 4391 is nearly identical to S. 1755 and to the provisions of the Commerce Committee version of H.R. 3489 that concern state taxation of mobile telephone services, and our cost estimates are the same for these provisions. H.R. 3489, as ordered reported by the House Committee on Commerce, also contains provisions concerning electronic eavesdropping.

ESTIMATE PREPARED BY:

Federal Costs: Mark Hadley

Revenues: Hester Grippando

Impact on State, Local, and Tribal Governments: Shelley Finlayson

Impact on the Private Sector: Jean Wooster

ESTIMATE APPROVED BY:

Peter H. Fontaine

Deputy Assistant Director for Budget Analysis
