S. 314

Foundation for the National Institutes of Health Improvement Act

*As ordered reported by the Senate Committee on Health, Education, Labor, and Pensions
on February 12, 2003*

S. 314 would modify the Public Health Service Act to change the law that governs the Foundation for the National Institutes of Health (NIH), a private, not-for-profit entity that raises private funds to support the work of NIH. It would specify that the Director of the National Institutes of Health and the Commissioner of the Food and Drug Administration remain as ex officio members of the board, make provisions for the continued operation of the board when vacancies occur, and correct an incorrect cross reference in the statute. The bill also would require that \$500,000 of the appropriations for NIH be transferred to the foundation. Such annual payments are authorized under current law but are not required.

CBO estimates that implementing S. 314 would have no significant budgetary effect. Enacting the bill would not affect receipts or direct spending.

S. 314 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would impose no costs on state, local, or tribal governments.

The CBO staff contact is Christopher Topoleski. This estimate was approved by Peter H. Fontaine, Deputy Assistant Director for Budget Analysis.
