**H.R. 1567**  
**Stop Tuberculosis (TB) Now Act of 2007**

*As ordered reported by the House Committee on Foreign Affairs  
on July 31, 2007*

H.R. 1567 would authorize the appropriation of \$400 million in 2008 and \$550 million in 2009 for programs working to control the global spread of tuberculosis. CBO estimates that implementing the bill would cost \$93 million in 2008 and about \$900 million over the 2008-2012 period, assuming that the authorized amounts are appropriated and that outlays will follow historical spending patterns for those programs. Enacting the bill would not affect direct spending or revenues.

The estimated budgetary impact of H.R. 1567 is shown in the following table. The costs of this legislation fall within budget functions 150 (international affairs) and 550 (health).

H.R. 1567 would authorize the appropriation of \$400 million in 2008 and \$550 million in 2009 for foreign assistance to improve the detection of tuberculosis, to reduce the number of tuberculosis-related deaths in other countries, and to provide funds for those purposes to international organizations. Of those amounts, \$70 million in 2008 and \$100 million in 2009 would be earmarked for global antituberculosis programs of the Centers for Disease Control and Prevention.

H.R. 1567 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would not affect the budgets of state, local, or tribal governments.
