

**CONGRESSIONAL BUDGET OFFICE  
COST ESTIMATE**

June 30, 2010

**S. 2933  
Colonel Charles Young Home Study Act**

*As ordered reported by the Senate Committee on Energy and Natural Resources  
on June 21, 2010*

S. 2933 would require the National Park Service (NPS) to conduct a special resource study of the Colonel Charles Young Home in Xenia, Ohio. Colonel Young was an African-American who served in the U.S. Army between 1884 and 1922. In the study, the NPS would evaluate the resources of the site and determine the suitability and feasibility of designating it as a unit of the National Park System. The NPS would have three years to complete the study and report to the Congress on its results.

Based on information provided by the NPS and assuming the availability of appropriated funds, CBO estimates that carrying out the study required by S. 2933 would cost about \$250,000 over the next three years. Enacting S. 2933 would not affect direct spending or revenues; therefore, pay-as-you-go procedures would not apply.

S. 2933 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would impose no costs on state, local, or tribal governments.

On June 21, 2010, CBO transmitted a cost estimate for H.R. 4514, the Colonel Charles Young Home Study Act, as ordered reported by the House Committee on Natural Resources on June 16, 2010. H.R. 4514 and S. 2933 are very similar, and the CBO cost estimates are the same.

The CBO staff contacts for this estimate are Alan Eder and Deborah Reis. The estimate was approved by Peter H. Fontaine, Assistant Director for Budget Analysis.
