

**CONGRESSIONAL BUDGET OFFICE
COST ESTIMATE**

March 10, 2016

H.R. 2080
**A bill to reinstate and extend the deadline for commencement
of construction of a hydroelectric project involving
Clark Canyon Dam**

*As ordered reported by the House Committee on Energy and Commerce
on February 25, 2016*

CBO estimates that implementing H.R. 2080 would have no net effect on the federal budget. The bill would authorize the Federal Energy Regulatory Commission (FERC) to reinstate the license and extend the deadline for beginning construction of a hydroelectric project (number 12429) at Clark Canyon Dam in Montana. The proposed extension could have a minor impact on FERC's workload; however, because FERC recovers 100 percent of its costs through user fees, any change in that agency's costs (which are controlled through annual appropriation acts) would be offset by an equal change in fees that the commission charges, resulting in no net change in federal spending. H.R. 2080 would not affect direct spending or revenues; therefore, pay-as-you-go procedures do not apply.

CBO estimates that enacting H.R. 2080 would not increase direct spending or on-budget deficits in any of the four consecutive 10-year periods beginning in 2027.

H.R. 2080 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would impose no costs on state, local, or tribal governments.

On August 31, 2015, CBO transmitted a cost estimate for S. 1103, as ordered reported by the Senate Committee on Energy and Natural Resources on July 30, 2015. H.R. 2080 and S. 1103 are similar, and the CBO cost estimates are the same.

The CBO staff contact for this estimate is Megan Carroll. The estimate was approved by Theresa Gullo, Assistant Director for Budget Analysis.
