

**CONGRESSIONAL BUDGET OFFICE
COST ESTIMATE**

September 16, 2016

**H.R. 5065
Bottles and Breastfeeding Equipment Screening Act**

*As ordered reported by the House Committee on Homeland Security
on September 13, 2016*

H.R. 5065 would require the Transportation Security Administration (TSA) to notify air carriers, TSA security screening personnel, and other providers of screening services at airports about federal policies that allow baby formula, breast milk, and certain other liquids on airplanes. The bill also would require TSA to ensure that procedures for training federal and nonfederal screening personnel address those and other special screening procedures.

According to TSA, the requirements of H.R. 5065 are consistent with its existing administrative procedures; thus, CBO estimates that enacting H.R. 5065 would not affect the federal budget.

Enacting the legislation would not affect direct spending or revenues; therefore, pay-as-you-go procedures do not apply.

CBO estimates that enacting H.R. 5065 would not increase net direct spending or on-budget deficits in any of the four consecutive 10-year periods beginning in 2027.

H.R. 5065 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would not affect the budgets of state, local, or tribal governments.

The CBO staff contact for this estimate is Megan Carroll. The estimate was approved by H. Samuel Papenfuss, Deputy Assistant Director for Budget Analysis.
