## CBO's January 2017 Baseline Projections for the Student Loan Program.

On January 25, 2017, CBO corrected the borrower interest rates in Table 4.
These six tables detail the costs, loan volumes, and subsidy rates for the direct student loan program for CBO's January 2017 baseline.
Table 1 includes the cost projections for each budget account associated with the student loan programs using estimating procedures established in the Federal Credit Reform Act (FCRA).

Table 2 includes the projections of loan volume and subsidy rates for the direct student loans using FCRA.
Table 3 includes expenditures for student aid administration.
Table 4 includes the projection of the borrower interest rates
Table 5 includes the cost projections for the student loan programs using fair-value estimating procedures.
Table 6 includes the federal subsidy rates for student loans using fair-value estimating procedures.
The differences between federal credit reform and fair value estimating procedures are as follows:
FCRA requires that the lifetime costs of student loans be recorded up front on an accrual basis (that is, they are recognized in the year in which the loan is made). The lifetime cost of a federal loan-called its subsidy cost-is measured by discounting all of the expected future cash flows associated with the loan to a present value at the date the loan is disbursed. Those cash flows include the amounts disbursed, principal repaid, interest received, fees charged, and net losses that accrue from defaults.

Under the rules specified in FCRA, the present value of expected future cash flows is calculated by discounting those cash flows using the rates on U.S. Treasury securities with similar terms to maturity. For instance, the yield on a Treasury security maturing in one year is used to discount cash flows one year from disbursement, a two-year rate is used for cash flows two years from disbursement, and so on.

In contrast, under the fair-value estimating procedures, estimates are based on market values-market prices or approximations of market prices when directly comparable figures are unavailable-which more fully account for the cost of the risk the government incurs. The fairvalue approach accounts for the cost of market risk, which FCRA proceduresusing Treasury rates, do not.
The definitions of budget authority, program obligations, and outlays as they apply to the student loan program subsidy or "program" accounts are as follows:

Subsidy budget authority figures express what total subsidy costs would be if all the loans for which an eligible application was received during a year were made. In reality, not all loans are disbursed because prospective borrowers either do not show up for school or decide not to take all or part of the loan for which they applied.

Subsidy obligations are the costs associated with all loans for which there will be at least one cash disbursement (shown on the attached tables as Net Annual Loan Volume). Typically, the subsidy obligation estimates are not included in budget tables.

Subsidy outlays reflect the subsidy obligations adjusted for the timing of the cash disbursements. Because of the multiple disbursement requirements and the timing of the academic school years compared to the federal fiscal year, only about two-thirds of the dollars are disbursed to the borrowers during the first fiscal year. The remaining are disbursed in the following year.

Components may not add up to totals because of rounding.
${ }^{1}$ Totals do not include credit reestimates or loan modifications because the Office of Management and Budget has not announced those totals for fiscal year 2017.
${ }^{2}$ Projections of discretionary spending for administering student aid are based on an inflation of the budget authority provided in the most recent appropriations act rather than on an estimate of the future costs of administering
the program. This total does not reflect any potential reductions in spending stemming from the across-the-board cut ( 0.1901 percent) that is part of the continuing resolution that expires on April $28,2017$.
${ }^{3}$ Projections of mandatory spending for administering student aid are based on estimated future costs of administering federal loan programs

a. Totals exclude consolidation loans stemming from loans issuied prior to 2017.
b. The subsidy rate is the net present value of the future federal cash flows divided by the loan dollars disbursed to borrowers each year. For example, the 2018 federal cost associated with the $\$ 100,716$ thousand in new
loan volume would be $-\$ 12,448$ million or $-12.36 \%$ of the new loan volume $\left[\$ 100,716^{*} . .1236=-\$ 12,449\right]$. In other words, the federal government will save on average about 12 cents for each new dollar loaned in 2018 .
c. Subsidy rates do not include federal administrative costs associated with disbursing and servicing loans. Those administrative costs are included in the budget on a cash basis (see Table 3).
d. Subsidy rates were calculated using CBO's January 2017 interest rate forecast.

Note: Components may not add up to totals because of rounding.
a. In the budget, funds for default prevention
b. Some of the funds for discretionary administrative costs are used for other student aid programs such as Pell grants

Table 4.
Projection of Borrower Interest Rates-CBO's January 2017 Baseline

| Award Year | $\begin{array}{r} \text { Actual } \\ 2016-17 \end{array}$ | 2017-18 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2023-24 | 2024-25 | 2025-26 | 2026-27 | 2027-28 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 10-year Treasury + 2.05\% Capped 8.25\% | 3.76\% | 4.29\% | 4.54\% | 4.82\% | 5.13\% | 5.45\% | 5.56\% | 5.61\% | 5.63\% | 5.65\% | 5.65\% | 5.65\% |
| 10-year Treasury + 3.60\% Capped 9.50\% | 5.31\% | 5.84\% | 6.09\% | 6.37\% | 6.68\% | 7.00\% | 7.11\% | 7.16\% | 7.18\% | 7.20\% | 7.20\% | 7.20\% |
| 10-year Treasury + 4.60\% Capped 10.50\% | 6.31\% | 6.84\% | 7.09\% | 7.37\% | 7.68\% | 8.00\% | 8.11\% | 8.16\% | 8.18\% | 8.20\% | 8.20\% | 8.20\% |

Notes:
Borrower interest rates are fixed for the life of the loan. The borrower interest rate is adjusted based on the last auction in May for the 10-year Treasury rate. That rate is in effect for all newly issued loans from July 1 through the following June 30

The borrower interest rates used for estimating the cost of the student loan program are different from the rates shown above. The rates used for cost estimating purposes are projected using a Monte Carlo method to capture the effect of having a cap on interest rates under current law.

| Parent Loans | -14.10\% | -14.69\% | -14.95\% | -15.50\% | -15.20\% | -15.11\% | -15.10\% | -15.07\% | -15.13\% | -15.21\% | -15.23\% |

 or $9.82 \%$ of the new loan volume $[\$ 100,716 \quad .982=\$ 9,889$ ]. In other words, the federal government will spend on average about 10 cents for each new doilar loaned in 2018.
Subsidy rates do not include federal administrative costs associated with disbursing and servicing loans. Those administrative costs are included in the budget on a cash basis (see Table 5).
