H.R. 3202
Cyber Vulnerability Disclosure Reporting Act

*As ordered reported by the House Committee on Homeland Security
on July 26, 2017*

H.R. 3202 would require the Department of Homeland Security (DHS), within 240 days of the bill's enactment, to submit a report to the Congress describing the policies and procedures used to coordinate the sharing of information on cyber vulnerabilities with businesses and other relevant entities. The report also would describe how those policies and procedures were used to disclose such vulnerabilities over the past year and, if available, how recipients of those disclosures acted upon the information. Based on an analysis of information from DHS, CBO estimates that implementing the bill would cost less than \$500,000 over the 2018-2022 period; such spending would be subject to the availability of appropriated funds.

Enacting H.R. 3202 would not affect direct spending or revenues; therefore, pay-as-you-go procedures do not apply.

CBO estimates that enacting H.R. 3202 would not increase net direct spending or on-budget deficits in any of the four consecutive 10-year periods beginning in 2028.

H.R. 3202 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would not affect the budgets of state, local, or tribal governments.

The CBO staff contact for this estimate is William Ma. The estimate was approved by H. Samuel Papenfuss, Deputy Assistant Director for Budget Analysis.
