H.R. 7990 would authorize appropriations over the 2021-2025 period for Department of State programs to reduce international trafficking in drugs. It would authorize appropriations of \$4 million each year to build the capacity of foreign law enforcement agencies to detect and track synthetic drugs such as fentanyl. It also would authorize appropriations of \$1 million each year for an international exchange program for professionals working to reduce the illicit use of drugs. CBO estimates that implementing H.R. 7990 would cost a total of \$12 million over the 2021-2025 period. The remainder of the \$25 million in authorized appropriations would be spent after 2025. Such spending would be subject to the appropriation of the specified amounts.

The bill also would require the department to report to the Congress on its progress in reducing drug trafficking. On the basis of information about similar requirements, CBO estimates that providing the required reports would cost less than \$500,000 over the 2021-2025 period.

The costs of the legislation, detailed in Table 1, fall within budget function 150 (international affairs).
