CBO has not completed a review of the legislation for effects on spending subject to appropriation.

The legislation would
- Appropriate funds for education-related programs, labor-related programs, child care, human services and community support programs, and nutrition programs
- Increase the federal minimum wage to $15 per hour by 2025, which would affect the federal budget and impose intergovernmental and private-sector mandates
- Expand eligibility for federally funded workers’ compensation benefits to certain federal employees and maritime workers affected by the coronavirus
- Subsidize premiums for coverage under the Consolidated Omnibus Budget Reconciliation Act (COBRA) at 85 percent for people enrolled in that coverage through September 2021

Estimated budgetary effects would mainly stem from
- Increased federal spending on education and child care programs
- Increased federal spending resulting from changes in employment, prices, and the distribution of income caused by a higher minimum wage
- Federal subsidies for COBRA premiums

Areas of significant uncertainty include
- Projecting the rate at which various entities would spend new budget authority
- Projecting the duration of school closures related to the coronavirus pandemic
- Estimating the behavior of businesses and individuals in response to a higher minimum wage and how those responses would affect federal spending and revenues

Detailed estimate begins on the next page.

Legislation Summary

S. Con. Res. 5, the Concurrent Resolution on the Budget for Fiscal Year 2021, instructed several committees of the House of Representatives to recommend legislative changes that would increase deficits up to a specified amount over the 2021-2030 period. As part of the reconciliation process, the House Committee on Education and Labor approved legislation on February 9, 2021, that contains provisions that CBO estimates would, on net, increase deficits over that period by $281.3 billion.

The legislation would appropriate specified amounts totaling $220.1 billion for education-related programs, labor-related programs, child care, human services and community support programs, and nutrition programs.

The reconciliation recommendations also would make the following changes:

- Modify the 90/10 rule for proprietary postsecondary education institutions to include all federal education benefits in the formula for aid eligibility (a decrease in direct spending of $124 million over the 2021-2030 period);

- Amend the Fair Labor Standards Act (FLSA) to increase the federal minimum wage to $15 per hour by 2025 (an increase in direct spending of $60.1 billion and an increase in revenues of $14.7 billion over the 2021-2030 period);

- Expand eligibility for federally funded workers’ compensation benefits to federal employees and maritime workers affected by the coronavirus (an increase in direct spending of $103 million and $224 million, respectively, over the 2021-2030 period);

- Expand eligibility for certain nutrition programs (an increase in direct spending of $5.74 billion over the 2021-2030 period); and

- Provide a subsidy, in the form of a tax credit, for 85 percent of premiums for continuation coverage through the Consolidated Omnibus Budget Reconciliation Act (COBRA) to people enrolled in such coverage from the first of the month following the date of enactment through September 30, 2021 (an increase in the deficit of $9.9 billion over the 2021-2030 period).

Estimated Federal Cost

The estimated budgetary effect of the Committee’s reconciliation recommendations is shown in Table 1. The changes in outlays from the legislation fall within budget functions 370 (commerce and housing credit), 400 (transportation), 500 (education, training, employment, and social services), 550 (health), 570 (Medicare), 600 (income security), 650 (Social Security), and 700 (veterans benefits and services).
Basis of Estimate

For this estimate, CBO assumes that the reconciliation legislation will be enacted at the end of March 2021. Outlay estimates are based on historical spending patterns for affected programs and on information from affected agencies about implementation.

Direct Spending and Revenues

CBO and the staff of the Joint Committee on Taxation (JCT) estimate that enacting the Committee’s reconciliation recommendations would increase direct spending by $280.1 billion and reduce federal revenues by $1.3 billion over the 2021-2030 period, for a net effect on the deficit of $281.3 billion.

Subtitle A: Education Matters. Subtitle A would appropriate $170.6 billion mostly for education grants to respond to the coronavirus pandemic; the legislation also would amend the 90/10 rule, which would reduce spending by about $0.1 billion. Thus, CBO estimates that enacting subtitle A would cost $170.5 billion over the 2021-2030 period.

Part 1—Department of Education. The legislation would appropriate $170.1 billion for the Department of Education mostly to make grants to states, local education agencies, and postsecondary education institutions, which would result in outlays totaling $170.1 billion over the 2021-2030 period, CBO estimates. The Congress previously provided nearly $31 billion for education stabilization in the Coronavirus Aid, Relief, and Economic Security (CARES) Act, enacted on March 27, 2020, and another $82 billion for this purpose in the Consolidated Appropriations Act, 2021, enacted on December 27, 2020. Because most of those funds remain to be spent, CBO anticipates that the bulk of spending of funds provided in the reconciliation recommendations would occur after 2021. Specifically, the legislation would appropriate:

- $128.6 billion for the Elementary and Secondary School Emergency Relief Fund for preparation for, prevention of, and response to the coronavirus pandemic or for other uses allowed by other federal education programs;
- $39.6 billion to the Higher Education Emergency Relief Fund to provide grants to students or to defray institutional expenses related to the pandemic; and
- $2.0 billion for other education programs, including $850 million for the Bureau of Indian Education, $850 million for Outlying Areas (American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands), $100 million for the Institute of Education Sciences, and $91 million for student aid administration.

Section 2013 would modify the 90/10 rule, under which proprietary institutions that receive more than 90 percent of their overall revenue from student aid programs authorized under title IV of the Higher Education Act (including Pell grants and federal student loans) are
ineligible to participate in the federal aid programs. The legislation would expand the
definition of federal aid to include additional non-title-IV programs, such as veterans’
education benefits. CBO expects that amending the 90/10 rule would reduce the number of
students enrolled in proprietary schools, resulting in an estimated savings of $124 million
over the 2021-2030 period. Those savings would stem from a reduction in mandatory
spending for Pell grants ($78 million), student loans ($25 million), and veterans’ education
benefits ($21 million).

Part 2—Miscellaneous. The legislation would appropriate $480 million for grants to fund
activities related to the arts, humanities, libraries and museums, and Native American
language preservation and maintenance. CBO estimates outlays for those activities would
total $479 million over the 2021-2030 period.

Subtitle B: Labor Matters. Subtitle B would increase the federal minimum wage, provide
funding to the Department of Labor (DOL) for activities to help protect workers from
contracting COVID-19 (the disease caused by the coronavirus), and expand the eligibility of
federal employees and maritime workers who contract COVID-19 for federally funded
workers’ compensation benefits. CBO estimates that enacting subtitle B would increase
outlays by $60.6 billion over the 2021-2030 period.

Raising the Federal Minimum Wage. Section 2101 would amend the FLSA to increase the
federal minimum wage in annual increments from $7.25 per hour to $15 per hour in 2025
(shortly after enactment, the minimum wage would be $9.50 per hour). After 2025, the
minimum wage would rise by the annual percentage increase, if any, in the median hourly
wage of all employees. The legislation also would repeal the separate minimum wage for
tipped workers, teenagers, and disabled workers.

CBO estimates that enacting the higher minimum wage would increase the cumulative
budget deficit by $45.4 billion over the 2021-2030 period (and by $54.1 billion over the
2021-2031 period). The $45.4 billion increase over the 2021-2030 period is the net effect of
a $60.1 billion increase in direct spending and a $14.7 billion increase in revenues. (This
provision would affect both on- and off-budget spending and revenues. The increase in the
on-budget deficit would be $66.7 billion over the 2021-2030 period, CBO estimates,
consisting of a $48.8 billion increase in on-budget mandatory spending and a reduction in
on-budget revenues of $17.9 billion.)¹

Increasing the minimum wage would induce a number of behaviors among businesses and
people that would result in changes in prices, the distribution of income, employment, and

¹. Off-budget effects are designated by law as excluded from budget totals. The revenues and outlays of the two Social
Security trust funds (the Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund) and
the transactions of the Postal Service are off-budget.
other economic factors, CBO estimates. Those changes in turn would produce budgetary effects in revenues and in a broad set of federal programs, including the major health care programs, unemployment compensation, Social Security, nutrition programs, student loans, and retirement programs.

CBO estimates that the higher wages of some workers would lead to higher prices for goods and services, which would contribute to increases in spending for some federal programs. For example, CBO estimates that higher prices for long-term services and supports and medical services would increase costs to Medicaid. Changes in employment and in the distribution of income would increase spending for some programs (such as unemployment compensation) and reduce spending for others (such as nutrition programs).

Changes in employment and the distribution of income also would affect revenues. On net, revenues would increase under the provision, but those changes would result from a number of factors that worked in opposite directions. Revenues from payroll taxes for Social Security (which are categorized as off-budget) would increase. Other revenues would decline, on net, in part because income would shift toward lower-income people and away from higher-income people under the legislation, and lower-income people face lower tax rates, on average, than higher-income people do.

The basis of this estimate is described in significantly greater detail in CBO’s analysis of the budgetary effects of S. 53, the Raise the Wage Act of 2021, published on February 8, 2021.3

Other Provisions. Sections 2102–2104 would make additional changes to labor programs; CBO estimates enacting those sections would increase outlays by $477 million over the 2021-2030 period.

Section 2102 would provide $150 million to DOL for activities to help protect workers from contracting COVID-19. Much of the funding would be spent by the Occupational Safety and Health Administration on enforcement of workplace safety standards.

Section 2103 would expand through 2030 the number of federal employees with COVID-19 who are eligible for medical, wage replacement, and death benefits under the Federal Employees’ Compensation Act (FECA), under an assumption that those workers had contracted the illness on the job. FECA benefits are treated as direct spending; however, employing agencies ultimately bear the cost of federal workers’ compensation claims.

2. Consistent with CBO’s conventional approach to estimating the costs of legislation, these estimates incorporate the assumption that nominal gross domestic product would be unchanged. As a result, total income is roughly unchanged. Even so, the set of effects incorporated in this estimate is more extensive than the set incorporated in most cost estimates. That is because the effects on economic behavior that would affect the federal budget would be broader for increases in the minimum wage than for most policies that CBO examines.

Because FECA costs are charged back to a claimant’s employing agency by DOL, the ultimate costs are borne by those agencies’ accounts for salaries and expenses. CBO estimates enacting this provision would cost $103 million over the 2021-2030 period.

Section 2104 would establish the presumption that maritime workers with COVID-19 have contracted the illness on the job, making them eligible for medical, wage replacement, and death benefits under the Longshore and Harbor Workers’ Compensation Act. Employers or the employers’ insurance carriers would be reimbursed for the cost of those benefits through the end of fiscal year 2030. CBO estimates enacting this provision would increase outlays by $224 million over the 2021-2030 period.

Subtitle C: Human Services and Community Supports. Subtitle C would appropriate $48.4 billion for child care and other human service and community support programs, which CBO estimates would result in outlays of $48.4 billion over the 2021-2030 period. Specifically, the legislation would appropriate the following amounts:

- $276 million for programs authorized by the Elder Justice Act;
- $1.4 billion for programs authorized by the Older Americans Act;
- $39.0 billion for the Child Care and Development Block Grant program (including $24.0 billion for the new Child Care Stabilization Fund to provide assistance to providers);
- $1.0 billion for Head Start;
- $450 million for programs authorized by the Family Violence Prevention and Services Act and other programs to support survivors of sexual assault and domestic violence;
- $350 million for programs authorized by the Child Abuse Prevention and Treatment Act;
- $4.5 billion for the Low Income Home Energy Assistance Program;
- $425 million for the Department of Health and Human Services to allow for pandemic-related cost increases in programs of the Administration for Children and Families that provide direct services to children, which CBO interprets as funding that would support care provided by the Office of Refugee Resettlement to unaccompanied alien children; and
- $1.0 billion for the Corporation for National and Community Service, primarily to make new grants to community service programs and to increase the living allowances of AmeriCorps volunteers.

Subtitle D: Child Nutrition and Related Programs. Subtitle D would amend and provide funds for nutrition programs; CBO estimates enacting subtitle D would increase outlays by $6.6 billion over the 2021-2030 period.
Sections 2301 and 2302 would appropriate $490 million to fund an increase in certain benefits under the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) and an additional $390 million for activities to increase participation in WIC. Enacting those provisions would cost $880 million over the 2021-2030 period, CBO estimates.

Section 2303 would raise the age of eligibility from 18 to 25 for the Child and Adult Care Food Program at emergency homeless shelters for the duration of the public health emergency, which CBO estimates will end in July 2022. CBO estimates that enacting this provision would cost $180 million over the 2021-2030 period.

Section 2304 would expand the Pandemic Electronic Benefit Transfer (P-EBT) program by providing benefits in the summer months after a period during which schools are closed for at least five consecutive days, and expand eligibility to children under the age of 6 in households that receive Nutrition Assistance Program benefits in Puerto Rico, the Commonwealth of the North Mariana Islands, and American Samoa. CBO estimates that enacting this provision would cost $5.6 billion over the 2021-2030 period. Section 2304 would also extend P-EBT for the duration of the public health emergency. However, CBO anticipates that all schools will return to in-person instruction for school year 2021-2022, so CBO estimates that the extension would result in an insignificant cost in 2022.

Subtitle E: COBRA Continuation Coverage. Under current law, people who lose their job or experience another qualifying event that results in a termination of their employment-based health insurance are eligible to continue health insurance coverage through the Consolidated Omnibus Budget Reconciliation Act (COBRA). If an individual chooses to enroll in COBRA coverage, he or she may be required to pay up to 102 percent of the total premium and can maintain the coverage for 18 months. Under section 2401, qualifying COBRA enrollees would be required to pay 15 percent of the total COBRA premium from the first of the month following the date of enactment through September 30, 2021. The federal government would provide a subsidy on behalf of the individual for the remainder. People would be eligible for premiums to be paid on their behalf if they are enrolled in, or are eligible to enroll in, COBRA coverage because of an involuntary termination or reduction of hours at the time of enactment. Section 2401 would permit eligible people who did not previously elect COBRA coverage and eligible people who discontinued COBRA coverage prior to enactment to enroll within 60 days of being notified about the availability of these subsidies.

CBO and JCT estimate that enacting section 2401 would increase federal deficits by $9.9 billion over the 2021-2030 period. That increase in deficits would consist of a decrease in direct spending of $6.1 billion and a decrease in revenues of $16.0 billion over the period. Those effects would primarily stem from federal subsidies for COBRA premiums, partially offset by a reduction in federal subsidies for other sources of health insurance coverage.
Under current law, CBO and JCT project that about 1.3 million people would be enrolled in COBRA coverage on a full-year equivalent basis (FYE), representing less than 10 percent of the eligible population. The estimated take-up of COBRA coverage is low because premiums are not typically subsidized by employers as they are when people are actively employed. The remaining estimated 11.4 million eligible people who do not enroll in COBRA coverage would enroll in another form of insurance coverage or be uninsured.

In response to the availability of those subsidies, CBO and JCT estimate that an additional 2.2 million people, on a FYE basis, would enroll in COBRA coverage, resulting in a total of about 3.5 million FYE COBRA enrollees in 2021. In total, the agencies estimate that subsidies for COBRA—for existing and new enrollees—would increase deficits by $16.3 billion over the 2021-2030 period.

CBO and JCT estimate there would be offsetting effects as people who would newly enroll in COBRA coverage would no longer enroll in other sources of health insurance coverage that are subsidized by the federal government. Of the 2.2 million FYEs that CBO and JCT estimate would newly enroll in COBRA coverage, an estimated 1.1 million would have otherwise been enrolled in Medicaid or CHIP and about 600,000 would have forgone insurance coverage and been uninsured. About 200,000 FYEs would otherwise have enrolled in subsidized nongroup coverage and about 100,000 would have enrolled in nongroup coverage without subsidies. The remainder, about 200,000, would have been enrolled in employment-based coverage. CBO and JCT estimate that those changes in health insurance coverage would offset the cost of the new COBRA subsidy by $6.4 billion over the 2021-2030 period. On net, the COBRA provisions in the legislation would increase deficits by $9.9 billion over the 2021-2030 period.

Uncertainty
The Committee’s reconciliation recommendations would appropriate $220 billion in budget authority to new and existing programs—a substantial increase in funding for those activities. For example, funding to help K-12 and higher education institutions respond to the coronavirus pandemic and funding for the Child Care and Development Block Grant program would increase significantly. As a result, CBO’s estimates of the rate at which federal agencies, states, local education agencies, and other entities would spend those new funds are subject to considerable uncertainty, as is the question of whether those entities could spend the new funds within the allotted time.

CBO’s estimates are subject to other significant areas of uncertainty:

- Projecting the behavior of businesses and individuals in response to a higher minimum wage and how those responses would affect federal spending and revenues;
- Anticipating effects among proprietary postsecondary education institutions in response to a change in the 90/10 rule; and
• Projecting the duration of school closures related to the coronavirus pandemic.

Pay-As-You-Go Considerations

The Statutory Pay-As-You-Go Act of 2010 establishes budget-reporting and enforcement procedures for legislation affecting direct spending or revenues. The net changes in outlays and revenues that are subject to those pay-as-you-go procedures are shown in Table 1.

Increase in Long-Term Deficits

CBO estimates that enacting the Committee’s reconciliation recommendations would increase on-budget deficits in every year after 2030. Those increases would total more than $5 billion in each of the four consecutive 10-year periods beginning in 2031.

Mandates

The Committee’s reconciliation recommendations would impose intergovernmental and private-sector mandates as defined in the Unfunded Mandates Reform Act (UMRA) by requiring employers to pay a higher minimum wage to workers who are covered under the Fair Labor Standards Act. Among that group are workers who receive tips, teenage workers, and workers with disabilities. The legislation also would impose mandates by requiring group health insurance plans to provide notifications to beneficiaries related to continuation of coverage under COBRA.

CBO estimates that the aggregate additional amount paid to workers to meet the new minimum wage requirements would significantly exceed the thresholds established in UMRA for private-sector and intergovernmental entities in each year beginning in 2021 and 2022, respectively. In 2021, the intergovernmental threshold under UMRA is $85 million and the private-sector threshold is $170 million; both are adjusted annually for inflation.

CBO estimates that by 2025—when the minimum wage reaches $15 per hour—state, local, and tribal employers would be required to pay covered workers approximately $4 billion in additional wages annually. The additional annual cost to private-sector employers would be $45 billion. Those amounts do not account for employers’ possible responses to the higher minimum wage, which could include reducing hiring, altering the composition of the minimum-wage and non-minimum-wage workforce, or purchasing equipment that would substitute for workers.

If employers reduce hiring, CBO estimates that in 2025, public-sector employers would be required to pay covered workers $3 billion in additional wages. The additional cost to private-sector employers in that year would be $32.5 billion. CBO did not estimate the changes in costs to employers associated with other possible responses.

CBO estimated the cost of the mandates using monthly data from the Census Bureau’s Current Population Survey to estimate the distribution of workers’ hourly wages under
current law. In projecting hourly wages, CBO accounted for prospective increases in some states’ minimum wage rates, including those coming into effect under current and future state law.

CBO then identified the subset of workers covered under the FLSA whose hourly wages, in CBO’s projections, would fall below the schedule of minimum wages set by the legislation. For this analysis, CBO excluded workers who are not covered under the FLSA (including those in most small businesses and in occupations that generally are exempt from the FLSA) and workers whose estimated wages would be more than $15 per hour in 2025.

Employers would be expected to incur additional costs to increase the wages of workers who are not directly covered under this legislation, but that increase would not result from the employers’ compliance with the mandate.

The legislation also would impose a private-sector mandate by requiring group health insurance plans to include additional information about COBRA eligibility and premium assistance in notifications to beneficiaries. Because group plans routinely provide information to beneficiaries, CBO estimates that the additional cost of the mandate would be small.

**Previous Estimate**

This version replaces the estimate that was transmitted on February 15, 2021. In the previous version, the provision “Additional Funding for Aging and Disability Services Programs” showed $188 million in budget authority in 2022 that should have been shown in 2021. This version corrects that mistake. There is no change in estimated outlays, revenues, or deficit effect in any year or over the 2021-2030 period.
Estimate Prepared By

Federal Costs:

Susan Yeh Beyer (child nutrition programs), Meredith Decker (unemployment insurance and labor programs), Jennifer Gray (human services programs and the Special Supplemental Nutrition Program for Women, Infants, and Children), Sofia Guo (workplace safety programs), Jared Hirschfield (Consolidated Omnibus Budget Reconciliation Act), Paul B.A. Holland (veterans’ benefits), Justin Humphrey (education programs), Arin Kerstein (child care programs), Leah Koestner (education programs), Justin Latus (longshore workers’ programs, aging programs, and disability programs), Susanne Mehlman (Low Income Energy Assistance Program), Carolyn Ugolino (Consolidated Omnibus Budget Reconciliation Act), and Emily Vreeland (Consolidated Omnibus Budget Reconciliation Act)

Effects of the Minimum-Wage Increase:

Nabeel Alsalam, Susan Yeh Beyer, William Carrington, Yiqun Gloria Chen, Chad Chirico, Sheila Dacey, Meredith Decker, Devrim Demirel, Justin Falk, Nathaniel Frentz, Edward Gamber, Jennifer Gray, Cornelia Hall, Edward Harris, Julia Heinzel, Lori Housman, Justin Humphrey, Nadia Karamcheva, Brian Klein-Qiu, Leah Koestner, Jamease Kowalczyk (formerly of CBO), Justin Latus, Junghoon Lee, Avi Lerner, Sarah Masi, Noah Meyerson, Alexandra Minicozzi, Eamon Molloy, Hudson Osgood, James Otterson, Brooks Pierce, Allison Percy, Jeffrey Perry, Stephen Rabent, Dan Ready, Sarah Sajewski, Jeffrey Schafer, Kurt Seibert, John Seliski, Joshua Shakin, Naveen Singhal, Emily Stern, Robert Stewart, Carolyn Ugolino, and Emily Vreeland

Mandates:

| Increases or Decreases (-) in Revenues | | | | | | | | | | | | |

| Subtitle B. Labor Matters | | | | | | | | | | | | |
| Sec. 2101 Raising the Federal Minimum Wage | | | | | | | | | | | | |
| Total Revenues | -14 | 43 | -222 | -250 | -2,313 | 1,090 | 2,639 | 3,792 | 4,638 | 5,099 | 5,047 | 14,702 |
| On-budget Revenues | -14 | 43 | -222 | -250 | -2,313 | 1,090 | 2,639 | 3,792 | 4,638 | 5,099 | 5,047 | 14,702 |
| Off-budget Revenues | -14 | 43 | -222 | -250 | -2,313 | 1,090 | 2,639 | 3,792 | 4,638 | 5,099 | 5,047 | 14,702 |

| Revenues | | | | | | | | | | | | |
| Total Revenues | -11,966 | -5,946 | -222 | -250 | -2,313 | 1,090 | 2,639 | 3,792 | 4,638 | 5,099 | 5,047 | -1,381 | 3,786 |
| On-budget Revenues | -12,048 | -6,305 | -1,283 | -1,497 | -2,313 | 1,090 | 2,639 | 3,792 | 4,638 | 5,099 | 5,047 | -1,381 | 3,786 |
| Off-budget Revenues | 8 | 1,275 | 1,061 | 2,247 | 3,601 | 4,439 | 4,919 | 5,142 | 5,335 | 5,420 | 5,352 | 32,578 | 37,900 |

| Estimated Changes in the Deficit | | | | | | | | | | | | |
| Estimated Outlays | 34,855 | 74,305 | 53,305 | 40,628 | 31,672 | 17,503 | 10,350 | 7,375 | 4,722 | 5,995 | 8,665 | 281,334 |
| On-Budget Deficit | 34,855 | 74,305 | 53,305 | 40,628 | 31,672 | 17,503 | 10,350 | 7,375 | 4,722 | 5,995 | 8,665 | 281,334 |
| Off-Budget Deficit | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

Components may not sum to totals because of rounding.
Estimates relative to CBO's February 2021 baseline.
LIHEAP = Low Income Home Energy Assistance Program; Pandemic EBT = Pandemic Electronic Benefits Transfer Program; WIC = Special Supplemental Nutrition Program for Women, Infants and Children; n.a. = not applicable; " = between -$500,000 and $500,000.

Off-budget effects are designated by law as excluded from budget totals. The revenues and outlays of the two Social Security trust funds (the Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund) and the transactions of the Postal Service are off-budget. All effects in this table are on-budget unless otherwise noted.

- For more detail, see Congressional Budget Office, The Budgetary Effects of the Raise the Wage Act of 2021 (February 2021), www.cbo.gov/publication/56975.
- These sections would affect direct spending and revenues, which are shown separately.
- The estimated budgetary effects shown here differ from the estimated effects of the same provision that was included in the Reconciliation Recommendations of the House Committee on Ways and Means. The estimated budgetary effects of the provision in the Ways & Means legislation accounted for interactions with sections 9661 and 9663 in subtitle G of that legislation, which would increase marketplace subsidies for certain individuals, whereas this estimate does not.
