S. 134 would require the National Institutes of Health to prepare annual estimates of the costs of research conducted under the National Alzheimer’s Project Act. Those estimates would be submitted to the President for review and transmittal to the Congress. Because the agency already provides such information, CBO estimates that implementing S. 134 would have no additional effect on the federal budget.

The CBO staff contact for this estimate is Jing Guo. The estimate was reviewed by Chad Chirico, Director of Budget Analysis.
