Cost Estimate

June 13, 2024

H.R. 6452, Veterans Scam and Fraud Evasion Act of 2024

As ordered reported by the House Committee on Veterans' Affairs on May 1, 2024

By Fiscal Year, Millions of Dollars	2024	2024-2029	2024-2034
Direct Spending (Outlays)	0	0	-22
Revenues	0	0	0
Increase or Decrease (-) in the Deficit	0	0	-22
Spending Subject to Appropriation (Outlays)	*	5	12

Increases *net direct spending* in any of the four consecutive 10-year periods beginning in 2035?	No	Statutory pay-as-you-go procedures apply?	Yes
		Mandate Effects	
Increases *on-budget deficits* in any of the four consecutive 10-year periods beginning in 2035?	No	Contains intergovernmental mandate?	No
		Contains private-sector mandate?	No

* = between zero and $500,000.

H.R 6452 would establish a Veterans Scam and Fraud Evasion Officer within the Department of Veterans Affairs (VA). The bill also would increase the fees that VA charges borrowers for its home loan guarantees. Implementing the bill would increase spending subject to appropriation by $12 million and reduce direct spending by $22 million over the 2024-2034 period, CBO estimates.

Spending Subject to Appropriation

Under the bill, the Veterans Scam and Fraud Evasion Officer would be responsible for coordinating efforts to protect veterans from frauds and scams. The officer would promote resources for preventing frauds and scams, provide training to department employees, and coordinate with similar efforts of other federal agencies. Using information from VA, CBO estimates the department would require four full-time equivalent employees (the new officer and three support staff) to satisfy the bill's requirements. Compensation, benefits, and operating expenses would total $1 million in 2025, CBO estimates. After adjusting for inflation, staffing and operating the office would cost $12 million over the 2024-2034 period.

The costs of the legislation, detailed in Table 1, fall within budget function 700 (veterans benefits and services).

Direct Spending

H.R.6452 would increase the fees that VA charges borrowers for its loan guarantees. VA provides loan guarantees to lenders that allow eligible borrowers to obtain better loan terms—such as lower interest rates or smaller down payments—to purchase, construct, improve, or refinance a home. VA typically pays lenders up to 25 percent of the outstanding mortgage balance if a borrower's home is foreclosed upon. Those payments, net of fees paid by borrowers and recoveries by lenders, constitute the subsidy cost for the loan guarantees.[1] That subsidy is reflected in the budget as direct spending.

Under current law, the rates for most of the fees that borrowers pay to VA for loans guaranteed after November 15, 2031, will drop from a weighted average of about 2.3 percent to about 1.2 percent of the loan amount. The bill would extend the higher rates through November 29, 2031, thereby reducing the subsidy cost of loans guaranteed during that period. Using its forecast of loan volume based on data provided by VA, CBO estimates that extending the higher rates would decrease direct spending by $22 million over the 2024-2034 period.

1. Under the Federal Credit Reform Act of 1990, the subsidy cost of a loan guarantee is the net present value of estimated payments by the government to cover defaults and delinquencies, interest subsidies, or other expenses offset by any payments to the government, including origination or other fees, penalties, and recoveries on defaulted loans. Such subsidy costs are calculated by discounting those expected cash flows using the rate on Treasury securities of comparable maturity. The resulting estimated subsidy costs are recorded in the budget when the loans are disbursed or modified. A positive subsidy indicates that the loan results in net outlays from the Treasury; a negative subsidy indicates that the loan results in net receipts to the Treasury.

The CBO staff contacts for this estimate are Logan Smith (for other VA costs) and Paul B.A. Holland (for home loans). The estimate was reviewed by Christina Hawley Anthony, Deputy Director of Budget Analysis.
