H.R.7406 would authorize the appropriation of \$90 million each year from 2025 through 2029 for the National Institutes of Health to operate and report on the INCLUDE (INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndrome) project; \$90 million was appropriated for that project in 2024. The project includes studies, clinical trials, research, and training related to Down syndrome and co-occurring conditions. Assuming appropriation of the authorized amounts and using historical spending patterns for similar activities, CBO estimates that implementing the bill would cost \$355 million over the 2024-2029 period and \$91 million after 2029.

The costs of the legislation, detailed in Table 1, fall within budget function 550 (health).
